Sustainable Production

About Us

Our company, established in 2002, has started its activities with the production of Industrial Machinery Rubber Parts, Medical Products and Shoe Soles. It started producing "Bumper Plate" in 2004 and exported mainly to America until 2008.

Combining its experience in the sector with its vision, Gavia Sport started producing products such as Dumbbells, Barbells, Olympic Plates and Olympic Bars in 2008 in line with its continuity and sustainable growth strategies. Gavia Sport, whose brand awareness and Sunday share in the industry have been steadily increasing, is the leader in its sector.

OLYMPIC

WEIGHT

About The Product

Ideal for an olympic bar or loading a machine, and they are also perfect for performing workouts and exercises as resistance training with a single plate. An ergonomic design means these olympic plates can be used for many different workouts, or combined in one routine. Load them onto a bar or perform movements that complement bodyweight exercises for strength, cardio, core training and more.

The rings in the middle can not come out of product. The rings covered with galvanization. It is made of rubber with high abrasion and tear resistance. Since it uses high quality rubber raw materials, it does not contain any smell that will disturb the users. That product can withstand repeated drops and is safer for you and your equipment than iron plates.

We can also customize our olympic weights with your own logo (if available to prepare). This innovation allows you to promote your brand.

All Olympic Weight Kilograms

PROFESSIONAL

BARBELL

About The Product

It is made of rubber with high abrasion and tear resistance. Since it uses high quality rubber raw materials, it does not contain any smell that will disturb the users. High quality chrome plated bars are used which are resistant to corrosion. It's strong, but kind on gym floors, which makes it the ideal material for use in free weights.

The Professional Barbell is great for introducing compound lifts and for general strength training. Fixed weights are perfect for PT sessions, as no time is spent changing plates to achieve a desired weight.

We can also customize our barbells with your own logo (if available to prepare). This innovation allows you to promote your brand.

About The Product

Perfect for Commercial Gyms & Health Clubs as well as Garage Gyms/Home Gyms in need of a sturdy, reliable Dumbbell Rack

There are rubber shoes on the feet of Dumbbell Rack to prevent damage to the floor and to prevent the rack from slipping. In standard market products, there is a problem of breaking and falling because these shoe parts are made of plastic. But due to these rubber shoes, this danger possibility is eliminated.

Dumbbell holders are made from rubber. It does not break in any way and does not damage the Dumbbell product.

Dumbbell Rack parts and mounting equipment are sent in the box. The paint on the surface is a quality oven paint. It is guaranteed for 2 years.

BUMPER

PLATE

About The Product

It is made of rubber with high abrasion and tear resistance. Since it uses high quality rubber raw materials, it does not contain any smell that will disturb the users.

Metal hubs are chrome plated and rust resistant. Ideal for a bar or loading a machine, and they are also perfect for performing workouts and exercises as resistance training with a single plate.

These solid plates get straight to the point of Olympic lifting, with a simple design, moulded weight indicators and the endurance to last, lift after lift. Made from solid rubber, their low bounce gives practicality to a toughness that will stand the test of time.

CLYPS

www.gaviasport.com

About The Product

Never worry about your weight plates slipping off mid-lift again. Our Olympic barbell clips are engineered to keep your plates securely locked in place, allowing you to focus entirely on your performance not on your equipment.

Crafted to fit the standard 2" Olympic bars, these clips offer a tight, dependable hold on all types of weight plates. Their quick-release lever mechanism makes them incredibly easy to attach and remove saving you time between sets and keeping your training smooth and efficient.

Made from durable, high-strength materials, these clamps are built for repeated daily use, whether you're lifting in a commercial gym or your own training space. Their low-profile design ensures they stay out of your way, while their firm grip keeps every plate exactly where it should be on the bar, not the floor.

Lock in. Lift heavy. Train confidently.

Sustainable Production

Gavia Sport operates with a strong commitment to sustainability and environmental responsibility. By integrating recycled and eco-friendly materials into our production processes, we aim to minimize environmental impact while maintaining the highest standards of quality.

The use of recycled rubber in our products significantly reduces waste and helps prevent the expansion of landfills. This approach supports the preservation of natural resources and reflects our dedication to building a more sustainable future for the next generations.

Moreover, recycled materials contribute to lower energy consumption, further decreasing our environmental footprint. In an era of increasing demand for renewable energy and eco-conscious practices, Gavia Sport continues to optimize its production methods with a focus on energy efficiency and carbon footprint reduction.
